EXPERIENCE

MERN Stack Developer Intern **June 2026 – Present**

Irohub Infotech

- Applied MERN Stack skills to build full-stack web applications, working across frontend development, backend APIs, and database integration.
- Built responsive and interactive user interfaces using React.js, HTML, CSS, and JavaScript.
- Developed RESTful APIs and integrated frontend components with backend services and MongoDB databases.
- Practiced debugging, testing, and optimizing application functionality through hands-on project development.

PROJECTS

ChatSpace – Real-Time Chat Application

MongoDB, Express.js, React.js, Node.js, Socket.IO, Firebase, Gemini AI

- Developed a full-stack real-time messaging application with user authentication, private chats, group conversations, and profile management.
- Implemented real-time communication using Socket.IO and integrated WebRTC-based audio and video calling.
- Built additional features including group event creation, privacy settings, chat customization, and Gemini AI-powered chat summarization.
- Integrated Firebase Authentication and MongoDB for user authentication and data management.
- Deployed the frontend using Netlify and the backend using Render.

Cyber Threat Alerts & Auto-Defense System

Python, Flask, React, SQLite, WebSocket, Gemini API

- Developed an AI-powered Cyber Threat Intelligence platform integrating AlienVault OTX and Google Gemini API to collect, analyze, and summarize real-time cyber threat intelligence.
- Designed REST APIs, implemented threat scoring, role-based dashboards, and automated response workflows to enhance cyber threat monitoring and analysis.
- Implemented real-time alerts and automated/manual IP blocking across host and VM environments.
